

Global Specialists in Oil & Gas Safety Training

www.ogsafetytraining.com

About us

O&G Safety Training (UK) Limited is a UK based training provider specialising in the global oil and gas market. As an IADC member and course provider, we strive to deliver all our accredited courses via our extensive team of training professionals.

We are dedicated to:

- Providing engaging health and safety courses
- Providing experienced training professionals
- Deliver each course on time and on budget
- Advising and supporting you throughout your training programme

Global yet local

Our services are flexible and scaleable to ensure that your health and safety training is delivered on time and on budget. We understand the pressures oil and gas companies are under to maximise production, whilst keeping their staff safe in a testing environment.

Flexibility

Our structured and interactive training courses are developed to deliver pre-agreed aims and objectives.

We include a diverse range of activities and team exercises based on on-site scenarios, which allows each delegate to relate to their own working environment.

If you have very specific health, safety and environmental requests, our experienced instructors can create and develop the perfect bespoke programme for your organisation.

Roving instructors

Our principle instructors have spent their careers roving the globe delivering programmes at our client's locations, including oil and gas fields in Kuwait, Qatar, Iraq, India, throughout Africa and the United Kingdom.

Working At Height Awareness

This course is designed to give participants the knowledge, skills and understanding to work safely at height as well as utilising and maintaining the correct equipment.

Duration: 1 day

Location: Flexible - On-site at client's premises

Course Size: Min 4 - Max 15 delegates per 1 day course

Learning Outcomes:

- Definitions and work situations
- Material selection per activity
- Pre-use inspection
- Forbidden equipment
- Material utilization best practices
- O&G safety procedures

Basic Fire Awareness

This course will give students a basic awareness of fire and a basic level of competence & safety in the correct use of portable fire fighting equipment.

Duration: 1 day

Location: Flexible - On-site at client's premises

Course Size: 15 delegates per 1 day course

Learning Outcomes:

- Define the actions to be taken in the event of a fire
- Explain the theory of combustion
- Identify methods of fire spread
- Describe fire standards
- List the various classes of fire
- Recognise a variety of portable firefighting equipment
- Demonstrate safe and effective use of portable firefighting equipment

Confined Space, Entry and Rescue Awareness

This course is designed to give students the knowledge, awareness and understanding of Confined Space, Entry & Rescue Arrangements.

Duration: 1 day

Location: Flexible - On-site at client's premises

Course Size: 15 delegates per 1 day course

Learning Outcomes:

- Identify confined spaces
- Identify hazards and risk mitigation associated with confined spaces
- Identify the emergency response & PPE requirements
- Use safe working practices and site-specific procedures

Gas Tester Awareness

During this course the students will gain understanding about the hazards in confined spaces and what they can do as an authorized gas tester to make it safe.

Duration: 1 day

Location: Flexible - On-site at client's premises

Course Size: 15 delegates per 1 day course

Learning Outcomes:

- Identify the hazards of confined spaces
- Explain why we do gas testing before allowing employees to enter and work in confined spaces
- Identify the properties of hazardous gases that can be found in confined space
- Efficiently use a multi gas detector and conduct gas testing
- Understand and explain how the PTW system works
- Able to conduct gas testing on the rig site

H2S Awareness

During this course the students will gain understanding about the hazards of Hydrogen Sulphide and how we can work recognize & keep safe in this environment.

Duration: 1 day

Location: Flexible - On-site at client's premises

Course Size: 15 delegates per 1 day course

Learning Outcomes:

- Recognize the hazards associated with H2S and its likely effect on humans
- The values of H2S gas monitoring equipment
- Identify the various types of escape sets
- Understand and accept procedures relating to 'Working in a Hydrogen Sulphide Area'

Lock Out, Tag Out Awareness

During this course the students will gain understanding about the correct procedure of lock out tag out and the safe methods of implementing it.

Duration: 1 day

Location: Flexible - On-site at client's premises

Course Size: 15 delegates per 1 day course

Learning Outcomes:

- Lock-Out / Tag-Out
- Mechanical & Electrical isolations
- Implementing LOTO
- Documentation
- Proving & testing various isolations
- Restoring power and removing isolations
- Actions to be taken on electric shock

Permit to Work Awareness

During this course students will gain knowledge of the Permit to Work system and how we can implement it correctly.

Duration: 1 day

Location: Flexible - On-site at client's premises

Course Size: 15 delegates per 1 day course

Learning Outcomes:

- Understand the PTW system and when it is used
- Understand who is responsible for the PTW system, filling out the forms and signatures
